

One of the greatest compliments a record company can receive is to have the record buying public buy its product because they recognize its ability to handle a record that "does all" the best available of the artist's records.

SUN Records has always believed that why a hit is only as great as he is given the opportunity to be "heard" on the microphone. It has done this with some artists - Jerry Lee Lewis, Elvis Presley, Carl Perkins and many more including one of the greatest, JERRY CASH.

In this album, Johnny has another of his 14 million of "SUN RECORDS" performance that is sure to be one of the biggest selling releases to date. This album, along with the six previously released SUN albums listed on this cover, will give the record buying public one of the best collections of a truly great performer.

Johnny has not all new tracks to contemporary music with his unchanged style, which is displayed in one of his best "record store bargains" in this album, the "ORIGINAL SUN RECORDS OF JERRY CASH".
