Mastered from the original ??, 2-track, 30 i.p.s. master mixes MFSL engineers were quite impressed with the dynamic range and natural tonality present on the master tapes. When compared to previous versions, the new MFSL GAIN 2 mastering is much more dynamic and reveals detail and subtleties not heard on other versions. This new MFSL LP allows the full dynamic range to shine through, giving fans the chance to hear this album the way it was heard at Scream Studios, where mixing was expertly performed by Matt Wallace and David Bryson.
