Two sided 12" single contains Autumn Leaves in 45rpm on side A, and Alison's Uncle in 45rpm on side B. Now Available on Classic Records
*Clarity SVP-II 200g.

Clarity Vinyl represents the ultimate in vinyl formulations because it is comprised of over 90% percentage of the highest quality co-polymer available - a key component in vinyl pellets used for manufacturing vinyl records. Further, Clarity Vinyl has no carbon black additive, common in vinyl formulas for LP's. Carbon Black contains trace metals that become magnetized and cause "electrical distortions" in cartridges during playback that smears the sound. By taking out the Carbon Black, Classic Records is able to dramatically reduce the "electrical distortions" and thus bring more "Clarity" to the playback process, providing a more realistic musical experience to the listener and LP enthusiast.

45 rpm records have long been recognized as providing a higher fidelity musical experience resulting purely from the cartridge being able to extract more of the nuance from the complex vertical and horizontal groove modulations in stereo LP's. Classic Records Clarity Vinyl 45 rpm pressings are designed and manufactured to provide the "LOWEST DISTORTION" in every aspect of LP playback resulting in

putting the listener as close to the music as possible.
